

**HIRING LEADERS!**  
JOIN THE [AIR FORCE ROTC AT SDSU](#)

In the [Air Force Reserve Officer Training Corps \(AFROTC\)](#), you'll have the opportunity to pay for school through our scholarship programs, build lifelong friendships, and develop critical leadership skills. You'll work towards a future US Air Force and Space Force career for tomorrow, while working towards your degree today. We need a minimum of three years to prepare you for a lifetime of adventure. New students and transfer students are welcome.

Cadets participate in [Aerospace Studies Classes](#), [Leadership Laboratory](#), and [Physical Training](#). Additionally, the ROTC program gives back to the Corps, campus, and community through [Professional Development Training](#), cadet organizations, and service projects. These activities are designed to offer cadets a glimpse of the active-duty life and careers before they enter active duty. Cadets are able to take full advantage of ongoing educational opportunities and advanced career and leadership training. Upon graduation, as newly [commissioned](#) lieutenants, you will also receive excellent pay and benefits including healthcare, a housing allowance, and travel opportunities. Please join us for an important information and advising session.
